

IZEL BIANCHINA

SUMMARY

Full stack developer with practical experience in React, Node.js, and Django, supported by IBM certification and real-world projects. Skilled in API development, databases, and debugging, with a foundation in cybersecurity. Seeking a junior developer role to contribute and grow.

EXPERIENCE

Full Stack Developer (Projects & Training), 01/2025 - 01/2026

Self-Directed / Independent - Roodepoort

- Built and deployed full stack web applications using React, Node.js, and Django
- Developed REST APIs, integrating front-end with back-end systems to enhance application functionality
- Designed and managed databases using SQL and NoSQL

Freelance Developer & Technical Support, 01/2023 - 01/2024

Self-Employed - Johannesburg

- Debugged and resolved front-end and back-end issues
- Provided technical support and troubleshooting
- Applied basic cybersecurity practices to identify risks

Remote Operations Assistant, 05/2022 - 04/2023

PBMS (Remote)

- Managed remote administrative and operational tasks
 - Coordinated schedules, communications, and task tracking
 - Maintained organization and efficiency in a fast-paced remote environment
-

EDUCATION

Professional Certificate, Full Stack Software Developer, 2026

IBM - South Africa

- Completed 15-course programme covering full stack development, and cloud technologies
- Built and deployed full-stack applications using React, Node.js, Python, and Django
- Worked with Docker, Kubernetes, CI/CD and cloud-native systems
- Developed a SaaS-style capstone project
